Health Specifics

Comments

Are there allergies? (Specify)	Yes	No	
Is medication regularly taken? (Specify drug and condition)	Yes	No	
Is a special diet required? (Specify diet and condition)	Yes	No	
Are there any hearing, visual or dental conditions requiring special attention?	Yes	No	
Are there any medical or developmental conditions requiring special attention?	Yes	No	

Per NYS law, a blood lead test is required at 1 and 2 years of age and whenever risk of lead poisoning is likely. If the child has not been tested for lead, the day care provider may not exclude the child from child day care, but must give the parent information on lead poisoning and prevention, and refer the parent to their health care provider or the county health department for a lead blood screening test.

On the basis of my findings as indicated above and on my knowledge of the named child, I find that: he/she is free from contagious and communicable disease and is able to participate in preschool.

Yes No
